

# Case Study: British Army – Lean Six Sigma Green Belt Training Success Story

theknowledgeacademy

**Ben Cornbill**

Soldier  
British Army

## Why?

Ben, a Soldier in the British Army, **was preparing for a career transition and wanted to strengthen his skills** in process improvement. His goal was to gain practical capabilities that would support efficiency, continuous improvement, and value creation in future professional roles.

## Solution

Ben chose **The Knowledge Academy** due to its wide range of relevant courses offered at fair and competitive prices. He selected the Lean Six Sigma Green Belt training to develop a structured understanding of Lean Six Sigma principles and learn practical approaches to reducing waste and improving processes.

## Experience

Ben described his experience as **great**. He rated the course content **10 out of 10**, appreciating the detailed course content and high-quality supporting materials. He also praised the instructors for their diligence, strong subject knowledge, and clear explanations, which supported his learning throughout the course.

## Outcome

The training gave Ben a solid understanding of Lean Six Sigma techniques. He is now **better equipped to identify inefficiencies, reduce waste** and apply structured improvement approaches across different work areas.

## Results

- **Quality of Course Content:** 10/10
- **Trainer Feedback:** Exceeded expectations
- **Booking Experience:** Smooth and supportive

## Client Testimonial

**Ben Cornbill** 

Soldier, British Army

“The experience was great, with detailed content and excellent supporting materials. The instructor was diligent and clear, and I gain a strong understanding of Lean Six Sigma. I would recommend The Knowledge Academy because the training is valuable in the long run and supports broader professional growth.”
