

Case Study: Davidson Technologies – ArchiMate® 3 Training Success Story

theknowledgeacademy |

Maguy Medlej

Senior Consultant
Davidson Technologies

Why?

Maguy Medlej, a Senior Consultant at Davidson Technologies, **wanted to model complex Enterprise Architectures** using a shared, standardised language for clarity and consistency. Her goal was to communicate architectural concepts more effectively across business and technology stakeholders.

Solution

Maguy chose **The Knowledge Academy** to complete the ArchiMate® 3 training because of its structured and organised learning approach. The course offered a recognised modelling approach to present Enterprise Architecture in a clear and consistent manner.

Experience

Maguy described the training as **very interesting**. She rated the course content **9 out of 10** and shared that the trainer met expectations. She also praised that the training was delivered in a clear and easy-to-follow approach.

Outcome

The training **improved Maguy's ability to align strategy with transformation roadmaps** and solution design. This helped her present more credible, structured, and decision-ready architectural recommendations.

Results

- **Quality of Course Content:** 9/10
- **Trainer Feedback:** Met expectations
- **Booking Experience:** Very good

Client Testimonial

Maguy Medlej

Senior Consultant, Davidson Technologies

“The training enhanced my ability to align architectural models with business and technology priorities. The course was well organised and easy to follow. I would recommend The Knowledge Academy for its quality training and structured approach.”
