

Case Study: EY – SAFe® for Architects Training Success Story

theknowledgeacademy

Richard King

Senior Manager

EY

Why?

Richard King, a Senior Manager at EY, **wanted to gain a strong understanding of SAFe® methodologies and receive certification.** His objective was to develop the knowledge needed to support large-scale Agile delivery and strengthen his ability to implement SAFe® practices within his organisation.

Solution

Richard took the **SAFe® for Architects** course through The Knowledge Academy. The training provided focused training on applying SAFe® principles from an architectural perspective, supporting effective alignment between strategy, architect, and Agile delivery.

Experience

Richard described his training experience as **excellent**. He rated the course content **9 out of 10** and confirmed that the training met his expectations. He also highlighted the strong support provided throughout the process. The team was responsive and helpful, which made the overall experience smooth and positive.

Outcome

The training **enhanced Richard’s understanding of how to implement and maintain SAFe® methodologies.** He gained valuable insight into architectural alignment within SAFe®, strengthening his ability to support scaled Agile initiatives effectively.

Results

- **Quality of Course Content:** 9/10
- **Trainer Feedback:** Met expectations
- **Booking Experience:** Excellent

Client Testimonial

Richard King

Senior Manager, EY

“The course was excellent and met my expectations. It gave me clear insight into how SAFe® methodologies can be implemented and maintained effectively. Accessing the course was straightforward, and the staff provided excellent support. I would definitely recommend The Knowledge Academy to my colleagues looking for valuable learning experiences.”
