

Case Study: FMF Foods – Artificial Intelligence Training Success Story

theknowledgeacademy |

Ravinesh Sharan

IT Manager
FMF Foods

Why?

Ravinesh Sharan, an IT Manager at FMF Foods, registered in the Introduction to AI course as part of the **company's vision to implement Artificial Intelligence** within its operations. He wanted to build foundational knowledge that would support FMF's strategic direction and help prepare the organisation for AI-driven transformation.

Solution

Ravinesh completed the **Introduction to AI** training with **The Knowledge Academy**, a course selected by FMF's Training Department to support the **organisation's plans for AI adoption**. The course delivered a structured introduction to core AI concepts and applications aligned with FMF's strategic direction.

Experience

Ravinesh described his learning experience as **good** and rated the training **9 out of 10**. He found the course **easy to attend & access**, and appreciated the clarity with which the trainer explained AI fundamentals. The way the sessions were structured supported practical understanding and helped participants grasp how AI can be applied within real organisational contexts.

Outcome

The training **strengthened Ravinesh's ability** to support FMF's AI ambitions. He shared that the course has **helped them set up an AI Champions team** to drive adoption and guide implementation across the organisation. The foundational knowledge gained has contributed to more informed discussions and clearer planning around AI integration.

Results

- **Quality of Course Content:** 9/10
- **Trainer Feedback:** Met expectations
- **Booking Experience:** Managed smoothly by the organisation

Client Testimonial

Ravinesh Sharan

IT Manager, FMF Foods

“The training was good, easy to attend, and simple to access. It supported our vision and helped us to set up an AI Champions team to move forward with AI implementation.”
