Sajad Ahmad Lone

Survey Engineer

Fujairah Natural Resources Corporation

Why?

Sajad Ahmad Lone, a Survey Engineer at Fujairah Natural Resources Corporation, wanted to **enhance his understanding of Artificial Intelligence** due to the growing demand for AI skills. His aim was to strengthen his capability in using AI-driven drone applications and stay aligned with the rapid technological advancements shaping the industry.

Solution

Sajad took **The Knowledge Academy's** Artificial Intelligence & Machine Learning course, designed to build practical AI skills. He chose the training because of the organisation's strong reputation in delivering **up-to-date content aligned with the current demand in AI technology**.

Experience

Sajad described his experience as **excellent**. He rated the training **10 out of 10** and praised the trainer for meeting his expectations with clear delivery and supportive teaching. He also noted that the overall process was great and well-managed.

Outcome

The training **made Sajad's field aerial survey decisions easier** and more efficient by helping him understand how AI can be integrated into drone-based workflows. It enhanced his ability to apply modern techniques and improved the overall accuracy of his field operations.

Results

- **Quality of Course Content:** 10/10
- **Trainer Feedback:** Exceeded expectations
- **Booking Experience:** Excellent

Client Testimonial

Sajad Ahmad Lone

Survey Engineer, Fujairah Natural Resources Corporation

“The training was excellent and practical. It made our aerial survey decision-making easier and more efficient. I would definitely recommend The Knowledge Academy as the learning experience is modern, relevant, and prepares professionals for the rapid evolution of technology.”
