

# Case Study: KPMG – CISSP Training Success Story

theknowledgeacademy | 

**Rami Alzubaidi**

Associate Director  
KPMG

## Why?

Rami Alzubaidi, an Associate Director at KPMG, **wanted to strengthen his cybersecurity knowledge** through structured professional training. He sought to improve his understanding of information security concepts and develop stronger capabilities in the field.

## Solution

Rami chose **The Knowledge Academy** to complete the Certified Information Systems Security Professional (CISSP) training because of the organisation's strong reputation and professional learning approach. The course provided structured learning in cybersecurity principles, information security management and risk management practices.

## Experience

Rami described the training experience as **great** and rated the course content **8 out of 10**. He shared that the trainer met expectations and delivered the sessions in a clear and professional manner. He also appreciated the smooth booking experience and the timely coordination throughout the training process.

## Outcome

The training **strengthened Rami's understanding of cybersecurity and information security** practices. It also provided valuable knowledge that he believes will support his current responsibilities and future objectives.

## Results

- **Quality of Course Content:** 8/10
- **Trainer Feedback:** Met expectations
- **Booking Experience:** Smooth and supportive

## Client Testimonial

**Rami Alzubaidi** 

Associate Director, KPMG

“The training experience was great, and the sessions were delivered professionally throughout the course. The overall process was smooth, everything was managed on time, and the learning experience was highly valuable and informative. I would definitely recommend The Knowledge Academy for its professional approach and quality training.”
