

Case Study: Michelin – Instructional Design Training Success Story

theknowledgeacademy

Amit Pilavare

Manager - Educational Developer
Michelin India Private Limited

Why?

Amit Pilavare, a Manager and Educational Developer at Michelin India Private Limited, **wanted to design learning programmes that could directly influence business metrics** and improve learning impact at scale. His goal was to shorten development timelines and strengthen the effectiveness of training delivery across Michelin's global workforce.

Solution

Amit chose **The Knowledge Academy** to complete the Instructional Design training based on the trainer's strong profile and positive user ratings. The course provided structured learning in instructional design principles, needs analysis and practical approaches to designing effective learning programmes aligned with business goals.

Experience

Amit described the training as **very good** and rated the course content **8 out of 10**. He noted that the trainer met expectations and delivered the sessions in a satisfactory manner. The booking experience was good and straightforward to manage.

Outcome

The training **broadened Amit's perspective on learning design** and strengthened his approach to instructional development. It also equipped his team with practical capabilities to design more impactful learning programmes aligned with organisational needs.

Results

- **Quality of Course Content:** 8/10
- **Trainer Feedback:** Met expectations
- **Booking Experience:** Good and smooth

Client Testimonial

Amit Pilavare

Manager Educational Developer, Michelin India Private Limited

"The Instructional Design training was very good and delivered valuable insights into designing effective learning programmes. The course challenged my thinking and helped me approach learning design in a more strategic and impactful way. I would recommend The Knowledge Academy for its structured and professionally delivered training."
