

Case Study: Salisbury Hospital – PRINCE2® Training Success Story

theknowledgeacademy

Kirsty Green

Improvement Practitioner
Salisbury Hospital

Why?

Kirsty Green, an Improvement Practitioner at Salisbury Hospital, **wanted to develop project management skills** to manage projects confidently. As project management is new to her, she wanted structured knowledge and practical tools that would help her handle projects effectively.

Solution

Kirsty chose **The Knowledge Academy** to complete the PRINCE2® Foundation and Practitioner training after receiving **positive feedback** from learners who had previously taken our training courses. She selected this course to build a structured foundation in project management principles, processes, and best practices.

Experience

Kirsty described the training as **excellent**. She rated the course content **10 out of 10** and shared that the trainer exceeded her expectations. She praised the trainer's inclusive and interactive teaching approach, which kept her engaged and helped her understand complex concepts more easily. She also found the booking experience fine and straightforward.

Outcome

The training **gave Kirsty the confidence to plan and manage projects effectively** in her role. It also prepared her to mentor team members and apply her knowledge in practical project environments.

Results

- **Quality of Course Content:** 10/10
- **Trainer Feedback:** Exceeded expectations
- **Booking Experience:** Fine and supportive

Client Testimonial

Kirsty Green

Improvement Practitioner, Salisbury Hospital

“The training was excellent, and I gained valuable knowledge from it. The trainer was inclusive, engaging, and made complex topics easy to understand and remember. I would definitely recommend The Knowledge Academy for its clear delivery and practical learning approach.”
